Figure 1 consists of two panels. The top panel shows the mean estimator as a function of the parameter  $\alpha$ . The x-axis ranges from 0.05 to 0.15, and the y-axis ranges from 0.0 to 0.2. The curve starts at approximately (0.05, 0.05), rises to a peak of about 0.12 at  $\alpha \approx 0.08$ , and then decreases to about 0.08 at  $\alpha = 0.15$ . The bottom panel shows the variance estimator as a function of  $\alpha$ . The x-axis ranges from 0.05 to 0.15, and the y-axis ranges from 0.0 to 0.2. The curve starts at approximately (0.05, 0.02), rises sharply to a peak of about 0.18 at  $\alpha \approx 0.08$ , and then decreases to about 0.08 at  $\alpha = 0.15$ .
